SUMMARY

Full-stack and AI engineer who ships production software end to end: database schema, security model, containerised deployment and a passing test suite. Solo-built a live e-commerce platform (Next.js 16, TypeScript, Payload CMS, PostgreSQL) and delivered production LLM agents and automations for clients in the US, Latvia and Pakistan. Open to remote full-time, part-time and contract roles.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C#
Web: React 19, Next.js 16, Node.js, Payload CMS, FastAPI, Tailwind CSS, REST, JWT / RBAC, WordPress / WooCommerce
AI / Data: RAG, Anthropic Claude and OpenAI APIs, LangChain, LangGraph, MCP, FAISS, scikit-learn, SHAP, pandas, Power BI
Data / Infra: PostgreSQL, MongoDB, SQL Server, Docker, n8n, GitHub Actions, Vercel, Hetzner, Cloudflare R2
Testing: Playwright, Vitest, pytest, security auditing

EXPERIENCE

Full-Stack Developer (Freelance), Barakah Abaya | Remote | Jul 2026 - Present
- Sole engineer on a production e-commerce platform: hardened checkout, eight integrations, seven n8n order workflows.
- Security audit with 31 verified fixes; 56 Playwright and 245 Vitest tests. Payment and courier go-live pending merchant onboarding.

Contract Software Engineer, US travel-guide publisher | Remote | Feb 2026 - Present
- WooCommerce storefront and data pipelines for a travel-guide catalogue; OpenClaw, a 24/7 Claude-powered publishing assistant on a hardened VPS.
- Delivered all 27 contracted deliverables in 3 days against a 2-week estimate; Phase 2 added 13 features.

AI Contractor / Business Analyst, Turing | Remote | Jan 2026 - Jun 2026
- Side-by-side evaluation of LLM outputs, fact-checking and written justifications; four-hour overlap with US Pacific time.

AI Engineer (Contract), Sharpen-AI SIA, Riga | Remote | Oct 2025 - Dec 2025
- Production WhatsApp AI agent for a Latvian wood-products e-commerce client (n8n, Meta Cloud API, Zoho Sheets): lead qualification, live stock lookup, PDF offers, human handoff; handover package and UAT.

Data Science Intern, 10Pearls (Shine Program) | Remote | Sep 2025 - Nov 2025
- Serverless AQI forecasting pipeline for Karachi: 29+ features, four models benchmarked (best Ridge, R2 0.741), Streamlit and SHAP dashboard, GitHub Actions retraining.

Data Analyst Intern, Aga Khan University (Office of the Provost, IDAR) | Jul 2024 - Aug 2024
- Documented 8 institutional Power BI dashboards (Power Query, DAX, data model), recorded a tutorial video and presented to the Director of IDAR.

SELECTED PROJECTS

- **Agent Core** - Python multi-agent LLM framework: provider router with fallback, checkpointed execution, deterministic honesty gate (private).
- **Blink** - RAG policy assistant with a local LLM (Phi-3, FAISS, FastAPI, .NET); final-year project in a team of four (I built the policy data, SQL schema and RAG pipeline), among the top five at KIET.
- **Trip Split** - shared-expense web app on free tiers (Firebase Auth, Firestore Security Rules, GitHub Pages and Actions): used by a 7-person group to track 85 expenses (PKR 300,005); 47 unit tests plus emulator-tested security rules.
- **aqi-predictor, healthcare-translator, whatsapp-realestate-agent, minirag-demo** - public on github.com/Danish-Ahmed-Head.

EDUCATION AND CERTIFICATIONS

- B.S. Computer Science, KIET, Karachi (2021 - 2026; coursework completed Fall 2025, degree pending clearance).
- 32 Coursera certificates (Google, IBM, Duke, Microsoft, Meta, Johns Hopkins, DeepLearning.AI), including Google Data Analytics and Duke LLMOps; credential IDs on LinkedIn.

Languages: English (professional), Urdu (native), German (A1, self-study).
